Summary

I'm a Front end developer with 3 years of experience in building medium-sized web applications intended for hundreds of users. As a team-oriented person, I enjoy working together with my colleagues. I'm also able to pick up new technologies and frameworks relatively quickly to fit the schedule. Looking for new opportunities to further improve my career and skill set.

Work experience

Front End Web Developer
2019 October – Present | Werkz Technology of the Amdon Group
- Maintained and added new features to a legacy interactive e-Learning platform called Pagewerkz using Angularjs.
- Wrote unit test cases using Jasmine , maintained and further improved performance for an existing web application called Claswerkz which is a class management system using Angular.
- Developed from scratch and delivered several responsive and interactive web applications for an online learning platform called STEMWerkz with 1000+ users around the world.
- Collaborated with various team members to deliver the assignments on time using Scrum and Agile methods.

Front End Web Developer (Internship)
2019 May – 2019 August | DIR ACE Technology
- Developed an exam result viewer website using Spring boot Thymeleaf. Performed unit testing and integrated testing manually.
- Wrote mock-up web templates for a local stock exchange market website.

Web Crawler (Field study)
2018 November | Base Technology
- Collected daily news from local News websites by web crawling through them using python.
